Selecting an EZ Stream Kit

The major difference between the the EZ Stream Standard and Basic is the the video capture encoder. This integral piece of equipment allows your computer to recognize and capture your video input from your camera. While both kits contain the necessary encoder, our standard kit comes with a more powerful switcher capture device that can take up to four camera inputs and allow you to switch feeds with the click of a button.

The basic kit includes an intuitive plug and play capture device that is not a switcher to be used for single camera productions.

We recommend using the standard when possible. Having multiple cameras (even just a wide shot alternating with close ups) will allow for a more professional looking show if you can acquire a camera with HDMI output.

EZ Stream Kit Includes

- 20 ft Standard HDMI Extension
- 3.5mm to 3.5mm Audio Cable
- 3 velcro cable ties

Not Included in the Kit

EZ Stream Kits do not include a video camera, laptop, or sound systems. If you require additional hardware you must borrow, purchase or rent these items, some of which are available from our rental vendors.

A Note On Cables

To ensure the right cable, each kit comes with multiple HDMI and USB cable options. You will not need to use all of these cables, only the ones compatible with your particular camera and laptop.

Price

The Kit price is for a weekly rental and includes 2-way shipping. Please return the equipment with all of the included cables in a timely manner, to avoid additional rental or replacement fees. Standard is £179 and Basic is £99 plus VAT.

Availability

Equipment Kits are subject to availability and are subject to substitutions. We urge you to order your equipment kit early as reservations will be done on a first come first serve basis and there is no guarantee that a kit will be available for your show.

Recommended Vendors

Heartland Scenic Studio and bodymics.rentals are currently the only source for the official BookTix EZ Stream Kits. BookTix vetted many different brands of equipment to include in this EZ Stream Kit. Our goal was to do the research on your behalf and select the most reliable, versatile, and easy to use models.

Testing Equipment

Equipment kits should be opened immediately upon receipt to ensure all pieces of the kit are included and that nothing is broken from shipping. Additionally, you must test the equipment to ensure the functionality and compatibility of it with your equipment as soon as possible. It is your responsibility to notify the third party vendor of any issues with the kit within a reasonable amount of time from receiving it to allow them an opportunity to right the situation.

Setup and Technical Support

The BookTix Support Staff will be trained on the equipment recommended and provided in the kits. Please consult our tutorials and video instruction guides for assistance. You are free to use other brands, makes and models of equipment, however BookTix cannot guarantee that we will be able to provide you with technical support and troubleshooting of those devices. We will do our best to support you within our capabilities.

Stream Test

BookTix highly encourages arranging a stream test to make sure you can process a stream with the equipment prior to your public performance.

Additional Equipment

Our third party vendors can help you determine if any additional pieces of equipment are necessary such as: cameras, tripods, laptops, microphones, and additional cables and adapters. We strongly suggest talking to one of our recommended vendors about your options. Tell them about the equipment you are using and let them make suggestions as to what you might need.

Your Own Equipment

If you need or prefer to use a different brand, make or model of a specific piece of equipment, you certainly can. While our system is most likely compatible with equipment purchased or rented from other vendors, we cannot guarantee or provide technical support for other brands we have not tested.

Disclaimer

BookTix is not a party to any rental or purchase agreements made between you and the third party provider. BookTix is not responsible for the quality and condition of the equipment that is shipped to you. If you receive broken equipment or are missing pieces of the kit, you will need to contact the third party provider directly. Further, BookTix does not guarantee the functionality or compatibility of the above recommended equipment with your own personal equipment, i.e., cameras, soundboards, laptops, etc.
